SAGAR PRASAD NAYAK

AWS DevOps Engineer

Hyderabad • **+91 6370885203** • sagardevops96@gmail.com • linkedin.com/in/sagar-prasad-nayak-10441226b

AWS DevOps Engineer with **2+ years of hands-on experience** in cloud infrastructure, CI/CD automation, containerization, deployment management, and application delivery, with experience working on a **cloud-based Digital Healthcare Platform** at Avexa Systems Pvt Ltd. Proficient in **AWS, Jenkins, Docker, Kubernetes, Terraform, and Git/GitHub**, with hands-on experience in infrastructure provisioning, automated deployments, monitoring, release management, deployment validation, and troubleshooting. Skilled in **Prometheus, Grafana, and CloudWatch** for system monitoring and application health, with a strong focus on reliable, scalable, and efficient application delivery workflows.

RELEVANT WORK EXPERIENCE

Avexa Systems Pvt Ltd. 2025 - Present
Hyderabad

- Built and maintained Jenkins CI/CD pipelines to automate build, deployment, and release activities across development and staging environments.
- Containerized applications using Docker and managed container orchestration using Kubernetes to ensure scalable and consistent deployments.
- Provisioned and managed cloud infrastructure on AWS using Terraform and implemented Infrastructure as Code (IaC) practices.
- Utilized AWS services including EC2, S3, IAM, and CloudWatch for infrastructure setup, access management, monitoring, and log analysis.
- Managed source code, configurations, and release activities using Git and GitHub version control.
- Implemented continuous monitoring and performance visualization using Prometheus and Grafana to ensure application availability and system health.
- Supported build and release management processes, performed deployment validation, and assisted in troubleshooting deployment-related issues.
- Collaborated with development teams to maintain reliable deployment workflows and ensure stable application delivery.

Naresh IT (Hyderabad) 2024 - 2025
AWS DevOps Mentor

- Mentored students and professionals on AWS and DevOps fundamentals with focus on real-world implementation and industry best practices.
- Delivered hands-on training on CI/CD pipelines, Docker, Kubernetes, Terraform, Ansible, Jenkins, Git/GitHub, and AWS services.
- Guided learners in building and deploying real-time DevOps projects using Jenkins, Docker, Git, and AWS cloud platforms.
- Provided practical exposure to Infrastructure as Code (IaC), deployment automation, cloud resource provisioning, and troubleshooting deployment issues.

TECHNICAL SKILLS:

- **Cloud:** AWS (EC2, S3, IAM, VPC, RDS, CloudWatch, ELB, Auto Scaling, EKS, ECS/Fargate)
- **CI/CD:** Jenkins, GitHub Actions, CI/CD Pipeline, Build & Deployment Automation
- **Containers:** Docker, Kubernetes, Amazon EKS
- **Infrastructure as Code:** Terraform, Ansible
- **Version Control:** Git, GitHub
- **Monitoring:** Prometheus, Grafana, AWS CloudWatch, Log Analysis
- **OS & Scripting:** Linux, Python, Shell/Bash Scripting
- **DevOps:** Infrastructure Automation, Application Deployment, Production Support

PROJECT:

Digital Healthcare Platform

Description:

Worked on a cloud-based digital healthcare platform focused on healthcare applications, secure access, data integration, and reliable application delivery. Involved in scalable deployments, CI/CD automation, cloud infrastructure management, and application monitoring using modern DevOps practices. Contributed to deployment reliability, system performance, troubleshooting, rollback activities, and operational efficiency across multiple environments.

Technologies Used:

AWS, Jenkins, Docker, Kubernetes, Terraform, Ansible, Git/GitHub, Linux, CloudWatch, API Integrations

Key Contributions:

- Built and managed **Jenkins CI/CD pipelines** to automate application build, deployment, and release activities for digital healthcare services.
- Containerized healthcare applications and microservices using **Docker** and supported **Kubernetes** deployments for scalable and consistent environments.
- Managed **AWS infrastructure** using EC2, S3, IAM, and CloudWatch to support secure access, application availability, monitoring, and log analysis.
- Automated cloud infrastructure provisioning using **Terraform** and followed **Infrastructure as Code (IaC)** practices for consistent environment setup.
- Supported **healthcare application data integration and API communication** between services, ensuring reliable data exchange across the platform.
- Implemented **Prometheus and Grafana monitoring** and performed deployment validation, troubleshooting, and rollback activities to maintain reliable healthcare application delivery.

Outcome:

- Improved deployment automation, release efficiency, and application stability through standardized CI/CD and cloud infrastructure workflows.
- Supported scalable and reliable delivery of digital healthcare services through AWS, Kubernetes, Terraform, monitoring, and DevOps practices.

EDUCATION

Bachelor of Technology (Mechanical Engineering)

Bhadrak Institute of Engineering & Technology, BPUT, Odisha **8.1 CGPA**

CERTIFICATION:

- Career Essentials in GitHub Professional Certificate (May 2024)

Core Strengths: CI/CD automation, AWS infrastructure provisioning, Kubernetes-based application delivery, Terraform/IaC, monitoring, deployment validation, troubleshooting, and release management.
